

# Qvest Cloud

## Q.Create

### Cloud-based post-production with Avid

Start your cloud-based post production instantly. This Q.Create package is designed to provide teams of news editors, cutters and video artists with maximum freedom in working collaboratively and with unlimited up and down scalability on Avid Media Composer | Cloud VM and virtualized Avid NEXIS storage.

#### Easy Deployment

No technical knowledge is required. Q.Create is pre-integrated, cloud-hosted and fully managed by Qvest Media.

#### Cost Efficiency

No long term commitment is required. Software licences for editing seats or production capacities can be easily scaled up and down.

#### Collaboration

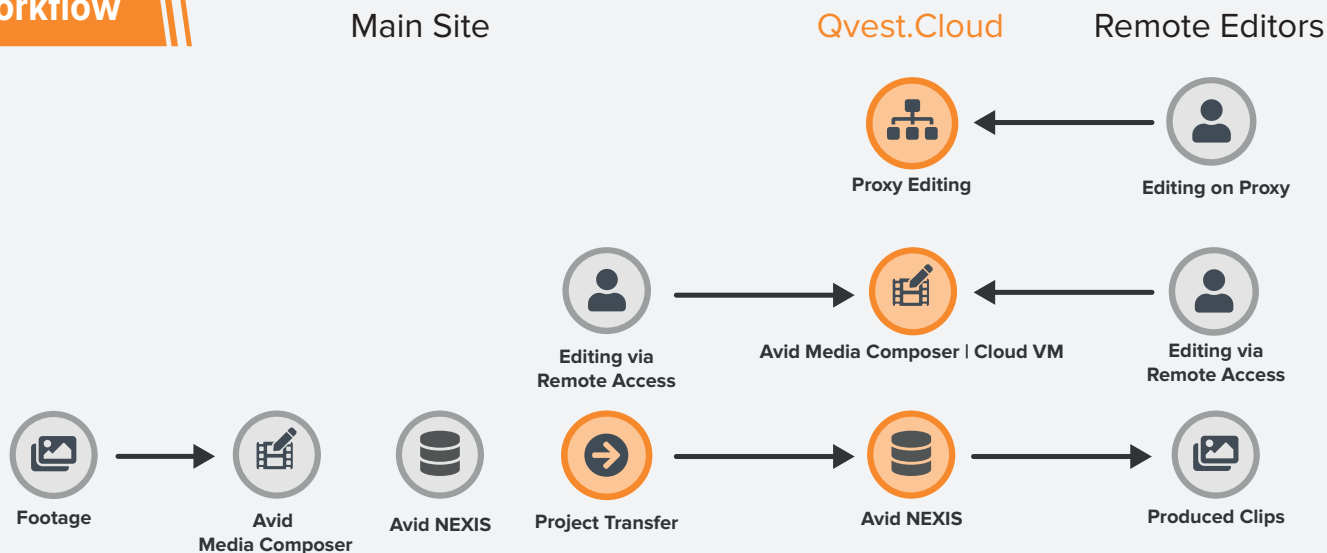

Flexibly work together from anywhere. Q.Create provides on-premise-connection and project transfer to the cloud.

#### Maximum Reliability

Q.Create offers 24/7/365 consistency due to cloud native software architecture and first-level support through Qvest Media.

## Key features

### Editing Workstation in the Cloud

Instant provision of as many powerful Avid workstations as you like to match the needs of your current project.

### Central Storage

All workstations access the same high performant and scalable virtualized Avid NEXIS storage in the cloud.

### Low Latency Access

Securely access the virtual workstation from anywhere in the world using your regular PC and benefit from a full frame rate confidence monitor.

### Global Collaboration

Collaborate with a global workforce with access to the same, secure infrastructure for everyone without the need to distribute and ship your content.

### On-prem Connection

Select projects in your on-premise Avid environment, push them to the cloud and continue working seamlessly from everywhere.

### Proxy-based Workflow

Perform your edits from a browser-based proxy editor and then apply to the high resolution material in Media Composer | Cloud VM.
